### New York Engineer Killed at Silver Peak

R. L. Hogue, of New York, an engineer representing some of the largest mine investment houses of that city, died this morning at Silver Peak from injuries received yesterday when his automobile went over an embankment at the Nivloc mine near Silver Peak. Mr. Hogue, who was driving in company with his wife and R. G. Cummings, was pinned beneath the steering wheel and had one side crushed forcing the ribs through the lungs. Cummings and Mrs. Hogue escaped virtually without a scratch. Dr. McCarthy was summoned from Goldfield and on reaching the mine found that he could only alleviate the man's suffering as death was merely a question of hours. Relief came this morning at 8:15 when the vital spark fled. In the meantime Cummings drove to Tonopah arriving here last night at 11 o'clock and took a nurse to the scene of the accident.

Mr. Hogue was scheduled to leave this morning for New York with the intention of presenting the Nivloc and the Silver Shield mines to the attention of his principals and the journey was undertaken to confirm certain details of the report. This business was concluded and the car which was loaned by George Quigley was started on the return trip when through some means the driver turned it directly over the embankment instead of to the inside of the road. The machine was not making more than six miles an hour when the accident happened. The car turned over twice in its descent.
